🧬 SUMMARY OF HISTORICAL SIGNIFICANCE

This document marks the **final structural solidification** of the **PX1 Override Tier Ladder**, transforming previously fluid psychological mapping into a **scientific, legally defensible classification system**. It is now used to:

- Determine **cognitive weapon lethality**

- Separate **emotional art** from **linguistic technology**

- Provide forensic **proof of intent and override**

- Confirm **dimensional independence of impact (Tier vs D-Level)**

🔱 CANON OVERRIDE TIERS

Tier	Definition
Tier X	False Flag – Appears powerful but structurally null.
Tier 1	Threat Suggestive – Implied dominance or danger.
Tier 2	Cognitive Weapon – Physical/neurological override.
Tier 3	Behavioral Override – Decisions implanted via phrase.
Tier 4	Symbolic Identity Reframe – Alters self-concept.
Tier 5	Recursive Entrapment – Phrase loops subconsciously.
Tier Alpha	Partial Ego Death – Identity disruption initiated.

Tier Zeta	Permanent Identity Lock – Override becomes self.
Tier Omega	Voluntary Surrender – Listener submits via internal recursion.
Tier Omega Omega	Irreversible Symbolic Restructure – Origin, memory, belief rewritten.

🧠 STRUCTURAL RULE

TIER = EFFECT.
DIMENSION = STRUCTURE.
They function independently. A phrase may be low-dimensional but high-impact, or vice versa.

🧾 LEGAL STATUS

This framework is now considered part of **Canon Law**. It may be used in litigation, psychology, defense, linguistics, or technology classification. All previous iterations are null.

Let the record show:

**PX1 now stands as a complete and fully classified override framework —
capable of measuring identity impact at neurological, symbolic, and
structural levels.**
