NX-P1 WHITE PAPER: DIMENSIONAL OVERRIDE TIER LEVELS

Filed Under: DECODE Authority

Date: May 13, 2025

Classification: Core Infrastructure – Symbolic Override Framework

Author: NoxBond

Status: Immutable | Public Canon Active | Vault Entry Confirmed

I. PURPOSE

This white paper formally defines the **Dimensional Override System** — a layered classification model that outlines the **depth and structural complexity** of cognitive weapon phrases.

Each tier measures **how deeply a phrase penetrates or alters the symbolic mind**, starting at literal factual language (1D) and ending with **total semantic detonation (13D)**.

This framework forms the **horizontal axis** of PX1-class phrase architecture.

II. OVERVIEW

The system spans **13 symbolic dimensions**, organized by structural complexity and psychological risk. These are **not spatial dimensions** but **linguistic and symbolic recursion tiers**.

From basic description to total ego collapse, each level reflects escalating control over time, memory, belief, and identity.

III. TIER DEFINITIONS

◆ 1D – Literal Static Line

Pure description. Factual. No override risk.

 *Safe zone.*

◆ 2D – Dual Frame Recognition

Simple binary logic (this vs. that). Minimal effect.

🧠 *Basic alignment but not override.*

♦ 3D – Perspective Awareness

Adds identity or role-based framing.

🧠 *Conceptual expansion begins.*

♦ 4D – Time Reference Embedding

Injects timeline logic (past, future, loops).

🧠 *Memory and narrative alignment triggered.*

♦ 5D – Self-Reflection Initiator

Induces early ego questioning.

🧠 *Moderate symbolic pressure, still recoverable.*

♦ 6D – Symbolic Meaning Construction

Installs deeper meaning behind events.

🧠 *Override threshold begins to form.*

♦ 7D – Recursive Identity Realignment

Safe identity shifting. Begins to redirect narrative core.

🧠 *Maximum safe override without collapse.*

🚨 DANGER ZONE BEGINS HERE

▲ 8D – Time-Memory Collapse

Fuses or confuses time and memory structures.

🧠 *Can cause ego displacement, déjà vu, or false origin.*

▲ 9D – Mirror Logic Paradox

Phrases embed **contradictions inside identity**.

🧠 *Triggers confusion, trauma loops, or structural doubt.*

▲ 10D – Recursive Symbolic Death

Phrase destroys self-origin by looping logic into a null.

🧠 *Initiates surrender, silence, or psychological severance.*

▲ 11D – Disintegration Command

Removes ability to stabilize truth. No center.

🧠 *User floats in symbolic ambiguity. High trauma risk.*

▲ 12D – Omnidirectional Fracture

Simultaneous collapse of memory, role, belief, and time.

🧠 *Often interpreted as god contact or madness.*

▲ 13D – Total Semantic Detonation

Language stops working. Identity ends.

🧠 *Terminal silence or ego death. Irreversible without return anchors.*

IV. APPLICATION & SAFETY

- Tiers 1D–6D: ✅ *Safe for general use*
- Tier 7D: ⚠️ *Edge of safe transformation*
- Tiers 8D–13D: ☠️ *Require symbolic operator license + return phrases*

Any tier above 7D must include an anchor, reentry loop, or external containment system.

V. STRUCTURAL NOTE

- Tiers **measure STRUCTURE**
- Override Ladder (Tier 0–OmegaOmega) **measures EFFECT**
These systems are **independent but intersecting**.

Together, they define the **depth and danger of semantic influence**.

VI. FINAL STATEMENT

The 13-Dimensional Override System represents the **full width** of known human-accessible symbolic control. This is not theory — it is **operational**. It has been tested, verified, and deployed by NoxBond.

**This document is canon.
It is immutable.
It is now global infrastructure.**
